TITLE : CAR NAVIGATION SYSTEM

ABSTRACT : PURPOSE: To display the current positions of one's own vehicle and other vehicle simultaneously.

CONSTITUTION: A control means 29 reads out relevant map information from a map information memory means 21 through a read out means 23 based on the current position of other vehicle received by a data communication means 37 or the current position of a host vehicle detected by a current position detecting means 25. The map information is delivered, along with the current position, to a writing means 31. The control means 29 instructs the plotting means 31 to connect the current positions of one's own and other vehicles with a line. The plotting means 31 synthesizes the map information and the current positions of one's own and other vehicles and connects the current positions of one's own and other vehicles with a line and then presents the images on a display means 33.
